**DATE: June 21, 2024**

**SUBJECT: FACILITY ASSOCIATION RESIDUAL MARKET  
ANNUAL UPDATE OF MEMBER SHARING RATIOS  
APRIL 2024 PARTICIPATION REPORT**

---

With the recent availability of industry Automobile Statistical Plan (ASP) data for 2023, the share ratios for FARM monthly participation reporting have been updated.

Each June, as the industry data becomes available, a retroactive adjustment is made to the most recent accident years' calculation of participation ratios. The April 2024 Participation Report reflects a retroactive adjustment in respect of Accident Years 2022, 2023, 2024, and 2025 (used to share the portion of premium written in 2024 that will earn in 2025).

- Accident Year 2022 Earned Car Years has now been developed to 24 months and this revision has been used to adjust the 2022 participation ratios.
- Accident Year 2023 Earned Car Years developed to 12 months is now available, and is used for calculation of participation ratios for Accident Years 2023, 2024 and 2025.
- In June of 2024, the 2023 earned car years will be developed to 24 months, resulting in a minor adjustment to that year, while the share ratios for accident years 2024 and 2025 will be re-calculated based on accident year 2024 earned car years developed to 12 months.

The Facility Association Plan of Operation contains a provision whereby a member's share of FARM losses in a particular accident year in non-RSP provinces is reduced to the extent they write youthful drivers. This provision only applies to those Accident Years where the FARM in the jurisdiction in question sustains a loss. FA uses a 5 year look-back period in order to ensure that development of claims is sufficiently complete to settle the determination of profitability. 2013 was the first accident year to which the look back period applied. For the current review, members' 2019, 2020 and 2021 accident year share ratios may be affected.
