

**TO:** All Agents and Brokers (All Canada)

**BULLETIN NO.:** ALL.AGCY 2026-01

**DATE:** March 31, 2026

**SUBJECT:** Fleet Rating Tool: Agent/Broker Version

---

Following the release of a new Fleet rating algorithm in June 2025, Facility Association (FA) is pleased to announce the launch of our Fleet Rating Module within the existing Nordic Raters. This enhancement supports Agents and Brokers in the quoting of fleet-rated risk in all jurisdictions as of March 31, 2026, following the initial release of the Agent/Broker version in Alberta on March 2, 2026.

This integrated module allows Agents and Brokers to generate fleet quotes directly within their current rating workflows, improving ease of use and ensuring consistent application of the rating algorithm. By leveraging this new capability, Agents and Brokers will benefit from increased quoting accuracy and greater pricing transparency for clients, supporting more informed discussions and an improved customer experience.

The fleet tool is available for download on the [Rater Tools](#) page of our website. A [training video](#) from FA's Learning and Development team is also available to guide users through the tool. If you encounter issues with accessing the tool, [click here to troubleshoot](#).

Documents are also accessible on <https://www.nordicbroker.ca/>.

This bulletin is being distributed by Servicing Carriers to whom all enquiries should be addressed.
