Rule 120: Grid	**Rule 120: Grid** A. **Rating Criteria** Grid premiums are the maximum premiums that can be charged for Liability and Accident Benefits coverage. They are calculated based on years licensed, at fault claims, convictions, territory and Liability limits. A chargeable accident resulting in only Liability to a third party will affect only the rating of the Liability coverage. A chargeable accident resulting in only Collision damage will affect only the rating of the Collision coverage. Criteria such as the age, gender, and marital status of drivers do not apply in determining the grid premium. The grid does not extend to additional or optional coverage including: • Optional physical damage on owned vehicles i.e. Collision, Comprehensive, Specified Perils • All endorsements to extend coverage • Any third party Liability limits in excess of $2,000,000 Whether a driver pays grid rates or less will be determined by Residual Market's own rates, underwriting rules and criteria. The lesser of the two (Residual Market's own rates or the grid rates) will always apply. **Exception:** Where Residual Market's premiums are lower than grid, grid premiums apply if the relevant driver has one or more of the following:	**Rule ~~120: Grid~~ Not applicable** B. ~~**Rating Criteria**~~ ~~Grid premiums are the maximum premiums that can be charged for Liability and Accident Benefits coverage. *Increased Deductibles due to prior loss history are only applicable to accident/claims arising from the ownership or operation of an automobile attributable to an Operator for whom a premium is charged. (Alberta only)

*Claims that have occurred under All Perils coverage shall be assigned to the appropriate section of the coverage i.e. Collision or Comprehensive

Higher deductibles shall only be imposed when there have been a sufficient number of claims under any given coverage to warrant such application.

Rule 113: Driving Record	The Residual Market policy term runs from January 2000 to January 2001. 1. In July 2000 the Insured's son who is a listed driver on the Residual Market policy has an at fault accident driving a company car assigned to him and is charged with the claim. No claim is made under the Residual Market policy. At renewal in January 2001, the claim is not included in the calculation of driving record on the Residual Market policy because the claim involved a listed driver who is being charged for the claim as the principal operator on another vehicle. 2. In July 2000, the Insured has an at fault accident driving a company car insured with the voluntary market side of the Servicing Carrier. At renewal the claim is not included in the calculation of driving record on the Residual Market policy because the claim occurred on a vehicle insured elsewhere after the commencement of the Residual Market policy. 3. Same as Example 2 but during 2000 there was no Collision coverage on the Residual Market policy and the claim on the company car was a Collision claim. At renewal the Insured adds Collision coverage to the Residual Market policy. The claim is not included in the calculation of the driving record on the Residual Market policy because the claim occurred on a vehicle insured elsewhere after the commencement of the Residual Market policy. 4. The vehicle on the Residual Market policy was insured for Liability, DCPD and Accident Benefits only. In July 2000 there was an at fault accident resulting in damage to the described vehicle but no payout was made because there was no Collision coverage. At renewal, the Insured adds Collision. The accident is included in the Collision rating because the accident involved the described vehicle. Definition of Accident</td>
<td>When an occasional driver (including male or female under age 25) is responsible for a chargeable accident, the accident must be included for rating purposes. If the occasional driver is removed from the policy, the accident shall be assigned to the vehicle on which it occurred.

At new business, where there are multiple vehicles and multiple drivers insured on a policy, any claims shall be assigned first to the vehicle for which the responsible driver is principal operator regardless of which vehicle was involved in the claim. If the responsible driver is principal operator of more than one vehicle, the claim shall be assigned first to the vehicle involved in the claim and if this is not possible, to the vehicle which that person principally operates that produces the highest premium. At renewal, any at fault accidents which occurred during the policy term shall be assigned to the vehicle on which they occurred.

For example: A new application is received. Applicant is principal operator of Vehicle 1 and has had 2 losses on Vehicle 1 and 1 loss on Vehicle 2. Spouse is principal operator of Vehicle 2 and has had 1 loss on Vehicle 1 and 1 loss on Vehicle 2. Rule 136: Accident and Conviction Surcharge	**B. Convictions** Only convictions of an operator for whom a premium is charged may be used in the development of surcharges. Conviction surcharges shall be assessed for traffic offences (as hereinafter described) for which the Insured was convicted in the 36 months immediately preceding the commencement of the period of insurance. **1. How to apply conviction surcharges:** No conviction record shall be used more than once to determine conviction surcharges for vehicles insured through FA by the same Servicing Carrier, whether or not insured on the same policy. Convictions for road offences shall not be used in the rating of off road vehicles (e.g. Snow Vehicles, All terrain Vehicles and vice versa. As long as there is a Class 05 or Class 06 premium charged on the policy, the conviction records relating to the Class 05 or Class 06 driver shall only be used to calculate surcharges on the Class 05 or Class 06 premium. Rule 145: Purchasing Vehicles in Jurisdiction Where FA Does Not Operate	When an Insured acquires a new vehicle and all vehicles owned by the Insured are covered under a POL 1, coverage is automatically provided for the newly acquired vehicle if the Insurer is notified of the acquisition within 14 days. When the Insured: a) acquires a vehicle in the U.S. and brings it to Canada to a jurisdiction in which FA operates, or b) acquires a vehicle in a jurisdiction in Canada in which FA does not operate; FA shall if necessary, issue a short term policy to provide coverage while the vehicle is in transit (under a transit authority permit) before it is registered in the jurisdiction of residence. Rule 148: Driver Training Vehicles	1. Calculate the premium as though the vehicle is used solely for driver training. 2. Calculate the premium as though the vehicle were used solely for the 'other use'. *For example*: If the vehicle is used for driving to and from work less than 17 km one way, use Class 02. 3. Add the dollar value of the driver training surcharge calculated in Step 1 to the premium calculated in Step 2. 4. Compare the premium in Step 1 to the premium calculated through Steps 2 and 3 and use the higher of the two. *For example*: **Step 1** The vehicle is a private passenger vehicle and using Class 07, the total premium is $700. The Liability premium is $150 and DCPD premium is $50. The vehicle is equipped with dual controls so a surcharge of 35% is applied to the Liability and DCPD premium for a surcharge of $70. The total policy premium calculated in Step 1 is therefore $770. **Step 2** The driver training use is part time and the Insured also uses the vehicle to drive to and from another job. Therefore a premium of $400 is calculated by rating the vehicle as Class 02. **Step 3** The premium in Step 2 is $400 and we add to that the surcharge premium of $70 calculated in Step 1. **Step 4** Use the higher of the results from Step 1 ($770) or Step 3 ($470). **D. B. Currency Differential Surcharge

Whenever proof of insurance is required by U.S. authorities, a currency differential surcharge is added to the Liability premium to provide for the potential additional loss arising from the payment of a claim in U.S. dollars.

The currency differential is the rate of exchange being charged for the U.S. dollar, to the nearest cent, as at the date the premium is calculated by the Servicing Carrier for policy issuance. The Servicing Carrier shall use the Bank of Canada closing rate from the previous published day.
The surcharge percentage is calculated by means of the following formula:
Currency differential x U.S. exposure surcharge
