Alberta Risk Sharing Pools – July 2017 Operational Reports

These results are discussed in some detail in the “Current Month Results” section below. For additional numeric detail, please refer to Exhibit 1 “Summary of Operations for Calendar Year 2017 for Risk Sharing Pool - Alberta Grid” attached to this bulletin.

Updated Projection to Year-end 2017

The projected calendar year Operating Result to December 2017 is -\$45.1 million and the estimated combined operating ratio to December 2017 is 130.3%. This updated projection to the end of the year has improved by \$0.5 million from the projection provided last month (-\$45.6 million and 130.4%). This improvement is driven by a \$1.5 million decrease in the projected written premium for the year.

Current Month Results

The Alberta Grid Risk Sharing Pool produced a -\$2.3 million Operating Result in the month of July 2017, a deterioration of \$0.7 million compared with the same month last year. This deterioration is composed of an estimated \$0.2 million unfavourable impact associated with the \$1.4 million increase in earned premium (at a combined ratio of 114.3%), with the remaining \$0.5 million deterioration stemming from the overall increase in the combined ratio (from 114.3% to 118.2% applied to \$12.6 million in earned premium).

This month’s results moved the year-to-date combined operating ratio from 145.5% at the end of 6 months to 141.5% at the end of 7 months. The 4.0 percentage point decrease is composed of a 2.9 percentage point decrease in the Prior Accident Years loss ratio, coupled with a 0.3 percentage point decrease in the Current Accident Year loss ratio, and a 0.8 percentage point decrease in the expense ratio.

Variances from Projections

The table below provides a summary of key components of the operating results compared to the estimates projected last month.

* Detailed information is included in [Alberta Grid RSP July 2017 Operational Report - Actuarial Highlights](#).

Each month, management reviews the variance between reported premium activity and claims activity (actual reported claims payments and changes in case reserves) and the associated actuarial projections. The projection process involves many assumptions including claims reporting patterns. Actual reporting patterns vary from month-to-month, sometimes considerably. Although variances from our projections are expected, management investigates variances beyond set thresholds and responds as appropriate.

For the month of July 2017, reported losses were \$1.7 million higher than projected. The Current Accident Year reported an unfavourable variance of \$33 thousand, and the Prior Accident Years reported an unfavourable variance of \$1.7 million. Of the Prior Accident Years, 2016 had the largest variance in reported losses at \$1.0 million unfavourable. No other single Prior Accident Year had a variance in excess of \$1.0 million.

The variances for claims activity were beyond the set thresholds for the Prior Accident Years for the month. Management investigated claims activity and is satisfied that the variances are appropriately accounted for in our current booking process. All other variances were within the set thresholds for the month.

Booking IBNR

The IBNR booking process this month allowed the nominal IBNR (i.e. before the impact of discounting and changes in provisions for adverse deviation) to vary from projected in order to offset the Prior Accident Years and Current Accident Year variances from projected, including the impact of earned premium variances (as IBNR is based on loss ratios). This is consistent with management's investigation into reported claims variances, concluding they were random and not necessarily indicative of a trend. IBNR is discussed in more detail in the [Alberta Grid RSP July 2017 Operational Report – Actuarial Highlights](#).

Effect of Quarterly Valuation

The July 2017 Alberta Grid Risk Sharing Pool Operational Report does not reflect the results of an updated valuation (the most recent valuation is as at March 31, 2017). The actuarial valuation will be updated next as at June 30, 2017 and we anticipate that the results will be reflected in the August 2017 Operational Report.

Alberta Non-Grid RSP - Summary of Financial Results

The calendar year-to-date Operating Result is -\$25.4 million and the incurred loss ratio to the end of 7 months is 108.2%, as summarized in the table at the top of the next page.

Updated Projection to Year-end 2017

The projected calendar year Operating Result to December 2017 is -\$41.0 million and the estimated combined operating ratio to December 2017 is 141.8%. This updated projection to the end of the year has improved by \$0.6 million from the projection provided last month (-\$41.6 million and 141.9%). This improvement is driven by a \$1.6 million decrease in the projected written premium for the year.

Current month results

The Alberta Non-Grid Risk Sharing Pool produced a -\$2.8 million Operating Result in the month of July 2017, an insignificant change from the same month last year.

This month’s results moved the year-to-date combined operating ratio from 146.7% at the end of 6 months to 144.9% at the end of 7 months. The 1.8 percentage point decrease is composed of a 0.3 percentage point decrease in the Current Accident Year loss ratio, and a 1.7 percentage point decrease in the expense ratio, offset by a 0.2 percentage point increase in the Prior Accident Years loss ratio.

Variiances from Projections

The table at the top of the next page provides a summary of key components of the operating results as compared to the estimates projected last month.

As discussed in relation to the Alberta Grid RSP, each month management reviews the variance between reported premium activity and claims activity (actual reported claims payments and changes in case reserves) and the associated actuarial projections. The projection process involves many assumptions including claims reporting patterns. Actual reporting patterns vary from month-to-month, sometimes considerably. Although variances from our projections are expected, management investigates variances beyond set thresholds and responds as appropriate.

For the month of July 2017, reported losses were \$2.0 million higher than projected. The Current Accident Year had a \$2.4 million unfavourable variance in reported losses, while the Prior Accident Years had a \$0.4 million favourable variance. No single Prior Accident Year had a reported loss variance in excess of \$1.0 million.

Booking IBNR

The IBNR booking process this month allowed the nominal IBNR (i.e. before the impact of discounting and changes in provisions for adverse deviation) to vary from projected in order to offset the Prior Accident Years and Current Accident Year variances from projected, including the impact of earned premium variances (as IBNR is based on loss ratios). This is consistent with management's investigation into reported claims variances, concluding they were random and not necessarily indicative of a trend. Effect of Quarterly Valuation

The July 2017 Alberta Non-Grid Risk Sharing Pool Operational Report does not reflect the results of an updated valuation (the most recent valuation is as at March 31, 2017). The actuarial valuation will be updated next as at June 30, 2017 and we anticipate that the results will be reflected in the August 2017 Operational Report.

Management Comments

Alberta Grid

The chart on the left shows the year-on-year change in the vehicles transferred to the Alberta Grid pool by month, with July showing a decrease of 350 vehicles. Our projection last month (in part based on previous projections provided by select member company groups) was for an increase of 161 vehicles, indicating a variance of 511 vehicles from the actual transfers. This variance was mainly due to two member company groups transferring a lower number

of vehicles to the pool in July than projected.

The chart on the left shows the overall change in the month, broken down by member company group changes (each blue bar represents the change for a single member company group), sorted by magnitude of change. Eleven member company groups transferred fewer vehicles to the pool this month compared with a year ago, while six transferred more and one remained the same. Of the 11 member company groups

transferring fewer vehicles, 2 member company groups accounted for 54% of the total transfer decrease for these “decliner” members. Of the 6 member company groups transferring more vehicles, 1 member company group accounted for 73% of the total transfer increases for these “grower” members.

The chart on the left presents the same information as the previous chart, but on a year-to-date basis. That is, it shows the overall change in transfer counts year-to-date, broken down by member company group changes (each blue bar represents the change for a single member company group), sorted by magnitude of change.

July’s vehicle count transfers to the pool represent a 5.7% decrease from July 2016, and counts were down 1.4% year-to-date. Average written premium was up 2.8% in July 2017 compared with the same month in 2016, and up 2.4% year-to-date (see charts at the top of the next page).

Alberta Non-Grid

The chart on the left shows the year-on-year change in the vehicles transferred to the Alberta Non-Grid pool by month, with July showing a decrease of 1,495 vehicles. Our projection last month (in part based on previous projections provided by select large pool participants) was for a decrease of 309 vehicles, indicating a variance of 1,186 vehicles from the actual transfers. This variance was mainly due to one member company group transferring a lower number of vehicles to the pool in July than projected.

The chart on the left shows the overall change in the **month**, broken down by member company group changes (each blue bar represents the change for a single member company group), sorted by magnitude of change. Eleven member company groups transferred fewer vehicles to the pool this month compared to a year ago, while six transferred more and one remained the same. Of the 11 member company groups

transferring fewer vehicles, 2 member company groups accounted for 70% of the total transfer decrease for these “decliner” members. Of the 6 member company groups transferring more vehicles, 2 member company groups accounted for 78% of the total transfers increase for these “grower” members.

The chart on the left presents the same information as the previous chart, but on a **year-to-date** basis. That is, it shows the overall change in transfer counts year-to-date, broken down by member company group changes (each blue bar represents the change for a single member company group), sorted by magnitude of change.

July’s vehicle count transfers to the pool represent a 22.6% decrease from July 2016, and counts were down 5.1% year-to-date. Average written premium was up 4.1% in July 2017 compared with the same month in 2016, but down 0.4% year-to-date (see charts at the top of the next page).
